

Balcony Netting on a residential highrise apartment.
[see it for yourself here](#)

Balcony Netting highlights:

- The only effective method to keep pigeons away.
- Available in 2" mesh size in black color.
- Inert, rot and waterproof, flame resistant and non-conductive.
- Withstands strong winds, won't freeze during winter.
- Low visibility, looks nice if properly installed.
- Guaranteed for 6-years*.

* Note that bird netting is not effective for other wildlife, such as squirrels, racoons or bats.

Balcony Netting installation details:

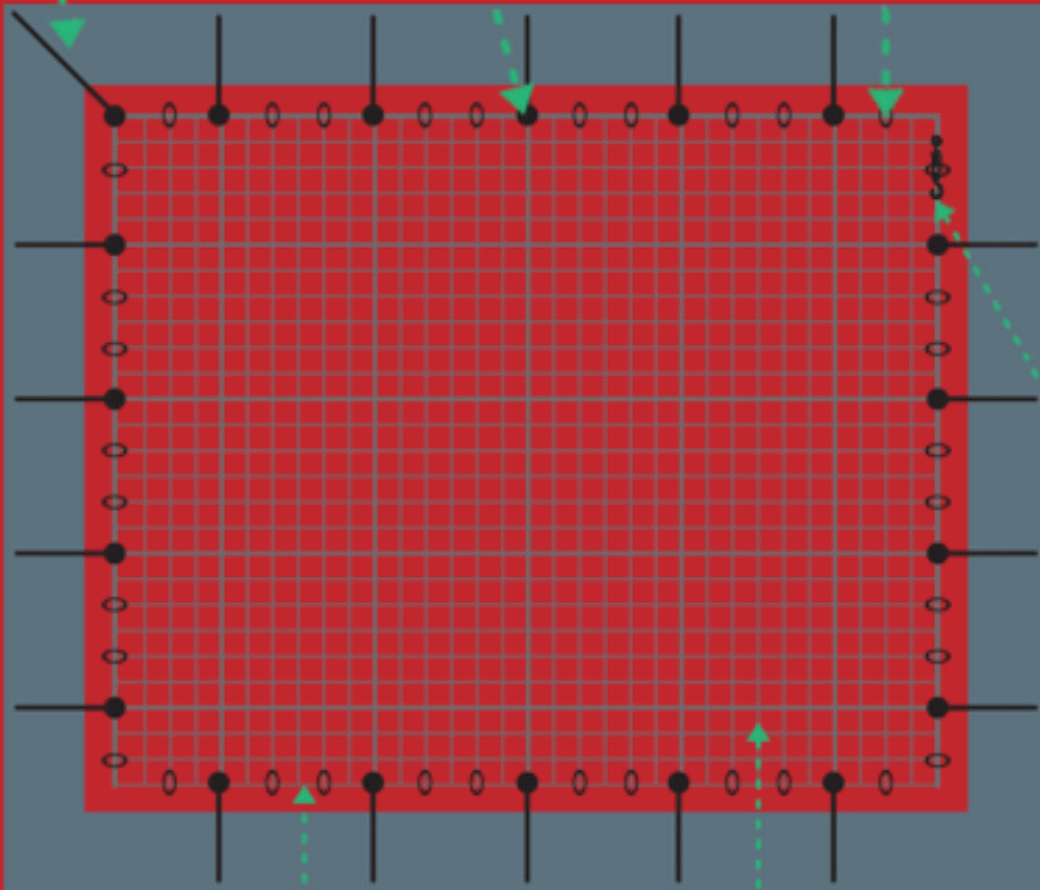

Tie wire wedge anchors

Wire guide brackets w/screws

C-rings

Turnbuckle

Aircraft cable

Bird Net

Our guiding principle when installing netting is to preserve the structural and aesthetic integrity of your building. These fastening hardware and installation methods are established industry standards and are recommended by Architects and Engineers in Canada.
